APPENDIX 1: Municipal Residential Drinking Water Systems' 2009-10 Inspection Ratings and Drinking Water Quality Results (Percentage of Tests Meeting Standards)

Pursuant to **O. Reg. 188/07** (Licensing of Municipal Drinking Water Systems), many of the ministry's municipal drinking water system owners have requested that the ministry adopt a consistent naming convention with the suggestion that their system name changes be identified on their new municipal licences/permits.

The change to the system licence/permit name will better reflect the legislative definition of "drinking water system" and will provide clarity with respect to public reporting. As a result of this request and the issuance of municipal licences/permits to system owners, the names of systems will be changed starting with this report. This list reflects naming as of March 31, 2010.

Municipal Location (Municipality Where the Drinking Water System is Located)	Drinking Water System Name	2009-10 Inspection Rating	2009-10 Drinking Water Quality (% Tests Meeting Standards)
Adjala-Tosorontio, Township of	Colgan Well Supply	92.43%	99.37%
Adjala-Tosorontio, Township of	Everett Well Supply	94.95%	100.00%
Adjala-Tosorontio, Township of	Hockley Well Supply	97.31%	100.00%
Adjala-Tosorontio, Township of	Lisle Well Supply	97.44%	100.00%
Adjala-Tosorontio, Township of	Loretto Heights Well Supply	91.96%	100.00%
Adjala-Tosorontio, Township of	Rosemont Well Supply	94.88%	100.00%
Adjala-Tosorontio, Township of	Weca Well Supply	97.33%	99.02%
Ajax, Town of	Oshawa-Whitby-Ajax Drinking Water System-Ajax	100.00%	99.89%
Alfred and Plantagenet, Township of	Lefaivre Water Treatment Plant	100.00%	99.76%
Alfred and Plantagenet, Township of	Wendover Water Treatment Plant	100.00%	99.80%
Alnwick/Haldimand, Township of	Grafton Well Supply	96.51%	100.00%
Amaranth, Township of	Waldemar Well Supply	100.00%	100.00%
Amherstburg, Town of	Amherstburg Drinking Water System	90.61%	100.00%
Armstrong, Township of	Earlton Well Supply	100.00%	100.00%
Arnprior, Town of	Arnprior Water Treatment Plant	95.06%	99.66%
Arran-Elderslie, Municipality of	Arran-Elderslie Well Supply	100.00%	100.00%
Arran-Elderslie, Municipality of	Tara Well Supply	100.00%	100.00%
Ashfield-Colborne-Wawanosh, Township of	Benmiller Inn Well Supply	100.00%	98.68%
Ashfield-Colborne-Wawanosh, Township of	Century Heights Subdivision Well Supply	100.00%	99.53%
Ashfield-Colborne-Wawanosh, Township of	Courtney Subdivision Distribution System	100.00%	99.74%
Ashfield-Colborne-Wawanosh, Township of	Dungannon Well Supply	100.00%	99.71%
Ashfield-Colborne-Wawanosh, Township of	Huron Sands Well Supply	100.00%	100.00%
Ashfield-Colborne-Wawanosh, Township of	South Lucknow Distribution System	95.29%	99.73%
Asphodel-Norwood, Township of	Norwood Well Supply	100.00%	100.00%
Asphodel-Norwood, Township of	Trentview Estates Development Distribution System	95.56%	100.00%
Assiginack, Township of	Assiginack Water Treatment Plant	95.68%	100.00%
Assiginack, Township of	Sunsite Estates Subdivision Water Treatment Plant	95.02%	100.00%

APPENDIX 2-A: Summary of Municipal Residential Drinking Water Systems Receiving Contravention Orders in 2009-10 as a Result of an Inspection

Drinking Water System Owner	Drinking Water System Name	Date Order Issued	Order Synopsis
Atikokan, The Corporation of the Township of	Atikokan Water Treatment Plant	July 22, 2010	• Ensure that training is provided to all operator and supervisory staff in the areas of: record keeping; sample collection; lab submission; and procedures for disinfection and maintenance/repairs. • Revise the 2009 summary report. • Provide a copy of log sheets/records related to secondary disinfection. • Ensure that changes to the system are provided to the ministry.
Blind River, The Corporation of the Town of	Blind River Well Supply	July 13, 2009	• Provide a report on the condition of all monitoring wells located in the vicinity of the production well field.
Greenstone, The Corporation of the Municipality of	Caramat Water Treatment Plant	June 28, 2010	• Provide a report on what actions will be taken to meet the Ontario Drinking Water Standards for trihalomethanes. • Provide a report as to how the water treatment plant will be operated in order to meet the requirements of Ontario Regulation 170/03. • Ensure that the minimum alarm is set to ensure primary disinfection. • Apply for a re-determination of the type and class of the subsystem. • Provide written confirmation that treated water samples are being collected as required. • Ensure that reporting requirements are being met. • Ensure that information is provided to a Provincial Officer, as required.
Mapleton, The Corporation of the Township of	Moorefield Well Supply	March 17, 2010	• Develop a written inspection schedule for all wells associated with the water treatment system. • Develop and implement an action plan to ensure that the information from the continuous monitoring equipment is not lost or destroyed and is backed up and reviewed as required.
Nipigon, The Corporation of the Township of	Nipigon Water Treatment Plant	March 18, 2010	• Ensure that an up-to-date process and instrumentation diagram is available at the water treatment plant. • Ensure the proper operation of the chlorine analyzers and turbidity meters on a continual basis. • Provide a report on the flow rate and daily volume of water conveyed from the treatment system to the distribution system.
North Middlesex, The Municipality of	North Middlesex (Lake Huron Area Water Supply) Distribution System	July 16, 2010	• Provide a comprehensive operations manual and make it available to operators of the distribution system.

APPENDIX 2-B: Summary of Municipal Residential Drinking Water Systems Receiving Preventative Orders in 2009-10

Drinking Water System Owner	Drinking Water System Name	Date Order Issued	Order Synopsis
Kingston, Corporation of the City of	King Street Water Treatment Plant	April 3, 2010	• Granting temporary regulatory relief from compliance with monitoring and recording requirements for the duration of site construction.
Smiths Falls, The Corporation of the Separated Town	Smiths Falls Water Treatment Plant	May 4, 2010	• Granting temporary regulatory relief from compliance with monitoring and recording requirements until a sampler or probe and analyzer are installed and operational.

APPENDIX 2-C-1: Summary of Laboratories Licensed to Perform Drinking Water Testing Receiving Contravention Orders in 2009-10

Municipal Location	Laboratory Name	Date Order Issued	Order Synopsis
Kingston, City of	Caduceon Enterprises Inc.	April 16, 2009	• Cease providing drinking water testing services without a licence. • Provide written notification to all clients that the aforementioned Caduceon Enterprises Inc. laboratories shall not analyze drinking water samples. • Provide a copy of the notification and list of the drinking water clients. • Provide a list of all parameters currently tested in drinking water and water matrices at each location. • Provide a copy of the policy/procedure identifying that all drinking water samples received will be analyzed in accordance with applicable regulatory requirements, identifying that drinking water samples submitted to one Caduceon laboratory are not transferred for analyses to another Caduceon laboratory, identifying the steps for subcontracting drinking water samples to another laboratory. • Ensure Caduceon Enterprises Inc. laboratories only test for parameters and test methods that are specified in the most recent version of their Drinking Water Testing Licence. • Identify whether tests performed on water samples submitted to the laboratory are drinking water tests regulated under the Safe Drinking Water Act. • Amend all drinking water chain of custody forms. • Prepare a chain of custody form for samples relating to non-drinking water.

APPENDIX 2-C-1 (Continued): Summary of Laboratories Licensed to Perform Drinking Water Testing Receiving Contravention Orders in 2009-10

Municipal Location	Laboratory Name	Date Order Issued	Order Synopsis
Ottawa, City of	Paracel Laboratories Ltd.	September 21, 2009	• Cease providing drinking water testing services without a licence.
Waterloo, City of	ALS Canada Ltd.	March 2, 2010	• Ensure all adverse test results are reported as per the legislation. • Provide confirmation that all staff have been trained on the policies and procedures. • Upload all approved drinking water results for nitrite analysis, nitrate analysis and nitrate plus nitrite calculations. • Conduct a root cause analysis to ascertain why only the nitrate plus nitrite data were submitted to the Ministry of the Environment's Drinking Water Information System and not the nitrate results and the nitrite results.

APPENDIX 2-C-2: Summary of Laboratories Not Licensed to Perform Drinking Water Testing Receiving Contravention Orders in 2009-10

Municipal Location	Laboratory Name	Date Order Issued	Order Synopsis
Guelph, City of	Cowan Agronomic Services Inc.	June 18, 2009	• Cease providing drinking water testing services without a licence.

APPENDIX 3-A: Summary of Municipal Residential Drinking Water System Convictions — April 1, 2009 to March 31, 2010

In 2009-10, three individuals and one corporation were convicted and fined $3,750 for charges related to drinking water offences at three municipal residential drinking water systems. The three municipal residential drinking water systems were not charged or convicted in these cases.

APPENDIX 3-B: Summary of Convictions for Laboratory Licensed to Perform Drinking Water Testing — April 1, 2009 to March 31, 2010

Facility Owner	Synopsis	Sworn Date	Conviction Date	Fine
Caduceon Enterprises Inc.	Using unlicensed methods for drinking water analysis.	November 18, 2009	February 4, 2010	$17,500
